Profile

Computer Engineering graduate with experience in web and mobile development. During my internship, I took a Flutter app that talks to real hardware from an unstable prototype to Google Play approval. As a personal project, I built ParkLog, a React Native app with AI car recognition and 173 automated tests. Looking for a trainee/internship programme or a Junior Developer position.

Education

BSc in Computer Engineering
Escola Superior de Tecnologia e Gestão de Viseu
09/2022 – 09/2025 · Final grade: 14.2/20

Experience

Mobile Developer Intern (Flutter)
Agricultural automation company
02/2025 – 09/2025

- Took over and finished a Flutter/Dart app that monitors a growing automation system in real time, communicating with the hardware over TCP/UDP.
- Made sensor values load instantly (down from 5 to 10 seconds), fixed charts and network crashes, and updated every outdated dependency.
- Added Google and biometric login, RTSP/HTTP cameras, light/dark themes and PT/EN/ES translations.
- Prepared the Google Play release (store listing, privacy policy, closed beta with the team); the app passed Google's review.

Projects

ParkLog – AI-powered car collection app — React Native · Expo
miguelscaetano.github.io/parklog

- Android/iOS app that suggests a car's brand, model and year from a photo, through a Cloudflare Worker that keeps the API key out of the app.
- Core logic in pure functions covered by 173 unit tests (Jest) running on GitHub Actions; works offline, with .zip backups and a PT/EN interface.

Full-stack business collaboration platform
Academic project

- Web and mobile app for internal team communication and collaboration, with user management and content sharing.
- Frontend and backend integrated through REST APIs, built as a team using Git.

Technical Skills

Languages
JavaScript, Python, Java, C#, C/C++, SQL, HTML/CSS

Web
React, Node.js, REST APIs, MVC, Bootstrap

Mobile
React Native, Expo, Flutter/Dart

Databases
PostgreSQL, MongoDB

Tools
Git, GitHub Actions, Jest, Linux, Cloudflare Workers, Arduino

Languages

Portuguese	Native
English	C2 (EF SET)
Spanish	Advanced
French	Advanced

Soft Skills

Teamwork and communication

Problem solving

Adapting to new technologies

Other Experience

Repair and resale of electronic devices (smartphones and computers)

Organising sports events and operational/logistics support

Administrative support and communication in local public services and community activities

Interests

Motorsport and car mechanics, football, boxing, fitness, outdoor activities
